

Call for papers:

Special issue “Quality improvement of ornamental flowers”

Submission deadline: 31 March 2024

Target publication date: starting from April 2024

Dear JSHS members,

We are very happy to announce that The Horticulture Journal launches a new special issue “Quality improvement of ornamental flowers” edited by Dr. Kazuo Ichimura (Fukukaen Nursery), Dr. Masayoshi Nakayama (Institute of Vegetable and Floriculture Science, NARO) and Dr. Kunio Yamada (Gifu University). We are now calling original research and review manuscripts for this special issue.

This special issue is devoted exclusively to the publication of original papers, review articles and frontiers articles on the quality improvement of ornamental flowers. This includes the areas of technology of cultivation, quality management, postharvest technology of ornamental plants. The following research areas will be considered if they improve the quality of ornamental plants: plant physiology, molecular biology, biotechnology.

Authors who are interested in submission, please notify the engagement of their manuscript to this special issue in the cover letter or the comment box in the Editorial Manager submission system. The deadline for submission is temporarily set to October 31, 2023, and the target publication date is April 2024.

* When submitting your article from Editorial Manager, please select "Special Issue Article" from "Select Article Type". In addition, please let us know in the Cover Letter or Author Comments that you wish to publish a special issue.
